EDUCATION

Cornell University, College of Engineering Ithaca, NY

B.S. in Mechanical Engineering, Minor in Aerospace Engineering *Expected May 2027*
GPA: 3.90

PROFESSIONAL EXPERIENCE

Hardesty & Hanover New York, NY

Mechanical Engineering Intern *Summer 2026*
- Developed CAD machinery drawings documenting component additions, removals, and repairs for contractor and client
- Compared in-person inspections against outdated drawings, using this information to create up to date CAD drawings
- Designed a linkage assembly to lift a 300-lb railroad track; calculated geometry, loading, and stress to verify performance
- Integrated a replacement actuator and centering-rod connection; modeled in CAD and used strain-energy analysis to verify sizing
- Conducted fatigue analysis on improperly manufactured shaft fillets to assess stress concentrations and cyclic failure risk

Amphenol RF Danbury, CT

Compliance and Quality Engineering Intern *Summer 2025*
- Prototyped and validated 12 PFAS-free BNC connectors with a team of interns
- Led validation testing by establishing baseline performance with reference parts and benchmarking new designs against results
- Streamlined PFAS reporting for ~10,000 parts by compiling weight, import volume, and chemical identities for federal submissions
- Developed Zwick tensile-test procedures to evaluate insertion force; coordinated testing with global offices and reported results

Brookfield Animal Hospital Brookfield, CT

Veterinary Assistant *May 2022 – August 2024*
- Worked closely with veterinarians during appointments, preparing necessary medical equipment and communicating with clients
- Ran laboratory tests, analyzing and relaying the results to veterinarians

ACADEMIC & LEADERSHIP EXPERIENCE

ASTRA Lab Aerospace Laboratory Ithaca, NY

Undergraduate Research Assistant *August 2026 – Present*
- Designing test chamber to simulate space temperature and radiation conditions for material testing
- Evaluating possible chamber configurations, component vendors, and relevant literature for final design selection
- Supporting chamber assembly and planned calibration of sensors and temperature-control systems
- Developing procedures and performing the testing for a new method of ion-propulsion precise image capture using UV light

Cornell Cup Robotics Ithaca, NY

Mechanical Engineering Sub-Team Member *September 2024 – May 2026*
- Designed a tethered submersible for depths up to 25 ft and speeds of 1-2 ft/s; designed propulsion using fluid mechanics
- Designed and prototyped a tambour-panel battery cover using CAD and 3D printing; machined components for implementation

Statics Undergraduate Class Ithaca, NY

Learning Facilitator *August 2026 – Present*
- Worked with students during in-class activities to answer questions and increase student understanding of the material
- Collaborated with professors and other learning facilitators to design new activities and improve on current ones

Zeta Beta Tau Fraternity Ithaca, NY

Cornell Chapter Risk Manager *August 2024 – May 2025*
- Oversaw security and safety for a 1,000+ attendee concert, coordinating with city offices and executive board to reduce risk

Cornell United Club Soccer Ithaca, NY

Vice President *December 2025 – Present*
- Manage team logistics, including field bookings, inter-team scheduling, and referee coordination

SKILLS & INTERESTS

Technical Skills: 2D and 3D CAD, Java, Python, MATLAB and Simulink, 3D Printing
Interests: Soccer, Skiing, Reading, New York Jets, Hiking
